

# McAfee Virex 6.1

## MCAFEE ACTIVE VIRUS DEFENSE

### Fast, Accurate, Award-Winning Virus Protection

Trusted by individual users and large companies alike, McAfee Virex is the world's premier virus detection and removal solution for your Macintosh computers. Virex fits seamlessly into any networked environment and updates itself, ensuring the most effective virus security solution is always guarding your troops.

The requirements placed on network availability by e-business take the threat of a virus outbreak to the next level – your bottom line. No longer are such outbreaks simply a nuisance. Today a virus outbreak that disrupts the flow of an organization's e-business activity will actually effect profitability. In fact, 1999 saw \$12.1 billion in damages as a direct result of virus infections, more than twice that of all previous years of virus attacks combined.

### Flexible Scanning Options

Virex provides comprehensive protection for your organization's Macintosh computers, capturing both known and new viruses before they infect multiple users. The award-winning scanning engine delivers high-speed scans of all files as they are accessed in real-time. The exclusive, easy to use Scan-At-Download scanner provides 24-hour protection from Internet downloads and files hidden in e-mail. Detected viruses can be automatically cleaned, deleted, or even quarantined for future analysis and origin tracing.

### Easy to Use

Virex software offers a new enhanced scheduler, which makes it easy to set up automated scans of your entire system or just certain files and folders. Just set it up and let Virex go to work protecting your file system from lurking viruses and other threats. Need to scan something right now? Scanning files and folders on demand is easy with DropScan – simply drag the item onto the DropScan icon and the scanning begins.

### Key Features:

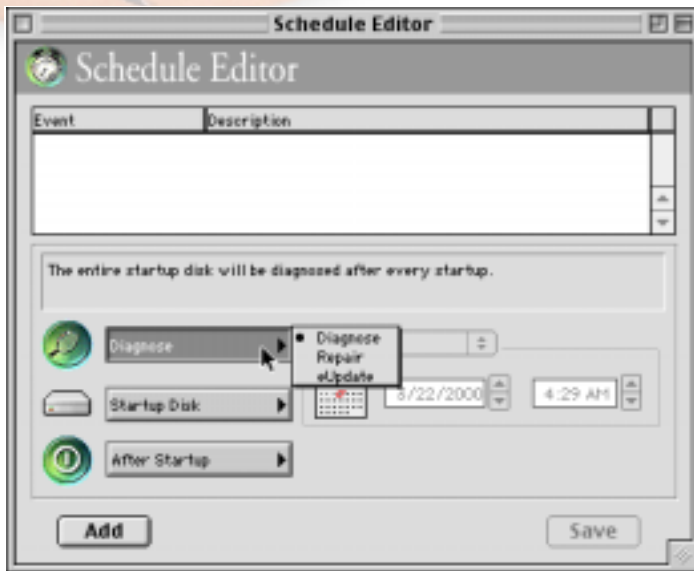

- 100% Detection & Cleaning  
Virex's award-winning scanning and cleaning engine is proven effective with more independent certifications of 100% detection and cleaning than any other in the world.
- Broadest Platform Support  
Virex supports a broad range of MacOS versions, from System 7.5.5 to OS 9.
- Automatic Updating  
Virex's eUpdate feature uses pull technology to keep your protection current at all times. All you have to do is tell it how often you want it to check for new files.
- Superior Internet protection  
Virex automatically scans for viruses as they are downloaded, providing protection against viruses in files downloaded from websites or FTP sites as well as e-mail attachments.
- Advanced Heuristics  
Virex can detect unknown viruses better than any product on the market with its ViruLogic heuristic scanning capabilities. Using positive and negative heuristics, VirusScan looks for characteristics suggesting a virus and those that identify the file as clean. The result is the world's best heuristic detection with the fewest possible false alarms.

THE VACCINE FOR E-BUSINESS

## Protection from the Newest Threats

There are many Anti-Virus products on the market today, but not all products have 100% detection and cleaning. In today's connected world we're witnessing the constant onslaught of new malicious code threatening corporate security. Virus writers are always there behind the scenes creating new attacks such as ActiveX and Java applets, worms, and Remote Access Trojans (RATs). To combat this never-ending threat and achieve the world's market leading detection and cleaning, McAfee VirusScan uses advanced heuristic technologies called ViruLogic to seek out previously undiscovered viruses. ViruLogic has the intelligence to know what characteristics viruses do and do not exhibit; something other scanners cannot achieve. The result is unparalleled detection of new viruses with the fewest possible false alarms. When a new virus is confirmed, the cure can be automatically generated and distributed to infected systems. VirusScan employs Vitran, a virus specific scripting language that enables researchers to create detectors and cleaners in a matter of seconds. This means quicker fixes for new ferocious viruses resulting in the best means to deal with virus outbreaks.

## Automatic Virus Definition File Updates

In the end, it all boils down to effective virus detection and removal. The McAfee virus scanning engine has more independent certification of 100% detection and cleaning than any other solution. Never the less, with more than 50,000 viruses in the wild, and 300 new ones cropping up every month, a virus security solution is only as good as its most recent update. Virex provides the best automatic updating, making the process of keeping your virus security state of the art a no-hassle proposition.

## AVERT

Advanced detection and quick to response to outbreak situations can only be achieved by a world leading virus research organization. McAfee Virex enjoys full support from the Anti-Virus Emergency Response Team (AVERT). A division of NAI Labs, AVERT employs more than 90 researchers located around the globe on 6 continents. This true follow-the-sun approach ensures that no matter where or when a virus may surface, the McAfee virus experts will be on the scene and fully armed.

## System Requirements

System 7.5.5 or higher

Minimum of 4 MB RAM
